

DURASTRIPE®

from ERGOMAT

DURASTRIPE vs PAINT

DuraStripe is an inexpensive, quick, easily installed and maintained, durable industrial floor marking system which provides exceptional versatility over painting options.

When all the costs of floor preparation, labor, and downtime are calculated, painting safety lines can cost \$6.00 or more per foot. Add to this the difficulty of getting sealed or polished floors to accept paint, and the colossal effort required to remove painted lines when reconfiguration is required and you have an extremely expensive, inefficient process for bringing your factory floor into safety compliance.

With options starting as low as \$1.00/per linear foot, choosing DuraStripe for your floor marking needs offers numerous advantages in price and efficiency. DuraStripe can be installed on a working factory floor during regular working hours. It requires no additional downtime or cure time. It adheres readily to sealed and polished floors and allows durable detailed graphic floor signage to be installed in minutes.

Please contact us for DuraStripe samples to learn how this remarkable product will work in your facility.

DURASTRIPE

The advantages of Peel & Stick

- Simply peel and stick to install
- Exceptional durability
- Backed by a 2 year warranty
- No dry time, no cure time or emitted fumes
- 9 standard colors and limitless custom color possibilities
- Wide range of Peel & Stick shapes, letters and numbers
- Different versions to target specific environmental conditions
- Easy to remove for reconfiguration
- Easily maintained and repaired

vs

PAINT

Paint

- Costly
- Time consuming
- Dry time and cure time = overtime or downtime
- Difficult to remove for reconfiguration
- Harmful gases
- Chipping and cracking may occur
- Costly to maintain consistent appearance
